Millard County, UT

Dear Mr. Munson,

The Fillmore field office of the Bureau of Land Management provided me with a satellite image map of the above referenced project, that delineates the disturbed area.

On February 27, 2003, a personal inspection of the area was made, which resulted in the determination that we are close to, or have possibly over extended the five(5) acres allotted for disturbance.

We are in the process of consolidating or moving off the claims certain used equipment that has accumulated just to the south of the main plant operation. this accumulation occurred as a result of an almost total revamping of the existing plant. This should decrease the size of disturbed area.

If your schedule permits, I would like you to grace us with a visit, not only to review the disturbed area but to observe our modified plant operations.

Looking forward to hearing from you, I remain,

Yours Very Truly,

M.W. Hamilton
